

JAWSforWindows[®]

Screen Reading Software

JAWS at a glance

Get started today working with all your Microsoft and IBM Lotus[®] Symphony[™] applications using JAWS, the world's most popular screen reader. Developed for computer users whose vision loss prevents them from seeing screen content, JAWS reads aloud what's on the PC screen.

- Everything you need to get started fast: talking installation, two speech synthesizers, and DAISY-formatted basic training.
- More than 15 years experience working with Windows[®].
- Works with all your Microsoft[®] applications, from Office to Internet Explorer 7 and Firefox[®].
- The same JAWS that delivers speech and braille to the PAC Mate[™].
- Fully-compatible with MAGic[®] screen magnification software.

JAWS supports versions of Microsoft Office Suite, Internet Explorer, MSN Messenger[®], Corel[®] Word Perfect, Adobe[®] Acrobat Reader, and many more applications.

Quickly learn to navigate the Windows environment with a DAISY-formatted basic training tutorial that includes text and audio instruction.

A free demo version of FSReader DAISY player application is included!

Now JAWS features two multi-lingual voice synthesizers: Eloquence and the RealSpeak Solo SAPI 5 synthesizer.

JAWSforWindows[®]

Screen Reading

More Features

- Remote access is supported via Citrix and Terminal Services (extra authorisation is required).
- Customise non-standard Windows applications with a powerful scripting language.
- The highly-responsive Eloquence multilingual synthesizer supports American English, British English, French, French Canadian, Latin American Spanish, Castilian Spanish, German, Italian, Brazilian Portuguese, and Finnish.
- The newly-added RealSpeak Solo, SAPI 5 synthesizer provides high quality voices in American English, British English, Australian English, Latin American Spanish, and Castilian Spanish, and many more.

Compatible with the most frequently-used workplace and classroom applications

JAWS enables you to work with Lotus Symphony, a suite of IBM[®] tools for word processing, spreadsheets, and presentation creation and with Lotus Notes[®] by IBM. JAWS is also compatible with Microsoft[®] Office Suite, MSN Messenger[®], Corel[®] WordPerfect, Adobe[®] Acrobat Reader, Internet Explorer[™], Firefox[™] - and many more applications that are used on a regular basis in the home, at work and in school.
